- 25X1X
- The following report on DEA I (Ost) oil production for May 1948 and financial statement for the second quarter of 1948 comes from another source, who is untested but well-placed. Oil production for the month of May 1948 at DEA I (Ost), Neusiedl, totaled 9,527 tons of crude oil pumped, containing 2.44% or 233 tons of foreign matter; 9,294 tons of crude oil were pumped to the tank-farm WIFO, at Hauskirchen in the Lohau. Oil production from 7 Yay 1948 to 1 June from the same field totalled 7,270 tons, of which 5,281 tons contained less than 37 water. Oil delivered had a specific gravity of 0.8596.
- 7. Only 63 of the 149 wells in the DEAI (Ost) area are producing. Soviet engineers, accompanied by Austrian personnel, are conducting explorations near Maustrenk and have struck oil at 1,200 meters. There is a noticeable drop in sas pressure in the whole area, but certain wells in UEA I (Ost) are still delivering 45 tons per twenty-four hour period. According to an official report delivered to the Kantrasse oil office, the average for each well during May 1948 was 330 tons. A production chart for 5 June 1948 reports that all Soviet-controlled oil fields in Austria produced 2,427 tons of crude oil on that date.
- About two weeks ago, twelve new caterpillar windlasses, manufactured by LINN-IDECO, Illinois, USA, were received in Zistersdorf. These are being lent to various fields in the area; two were sent to Milhberg. Small quantities of sed Romanian drilling equipment have also been received.
- The income of DEM I (Ost) for the second quarter of 1948 amounted to 2,428,500 schillings, while expenses amounted to 2,375,500 schillings. The following itemized financial statement was submitted to the Kantgasse office of NEA I (Ost).
